

## Part # 107V160

Underwater exhaust mufflers provide the best sound attenuation and exhaust reduction by discharging below the hull. At idle speeds a small bypass is used to vent to atmosphere to reduce engine backpressure. All underwater exhaust mufflers are provided with a white gel coat finish and are equipped with stainless crush sleeves inside the inlets and outlets. For installations where the engine is above the waterline only.

MATERIALS AND CONSTRUCTION			
Process	Filament Winding CNC, Resin Transfer Molding		
Resin	Class 1 Fire Retardant Epoxy Vinyl Ester Thermoset		
Glass	Corrosion-Resistant E Glass		
Glass/Resin Ratio	60%		
ATTRIBUTES			
A1 - Inlet/Outlet (IN/MM)	16/407		
A2 - Bypass (IN/MM)	8/204		
B1 - I/O Length (IN/MM)	12/305		
B2 - Bypass Length (IN/MM)	8/204		
C - Length (IN/MM)	55/1397		
D - Diameter (IN/MM)	35/889		
E1 - Inlet Elevation (IN/MM)	45.63/1160		
E2 - Bypass Elevation	5.75/147		
H - Height (IN/MM)	58/1474		
Color	White Gel Coat		
Approvals	Lloyd's Register Type Approval		
Flame Retardancy	UL94V-0
