

## 2.5" x 4" Coupling

### Part # 1200653

Made from the same materials as Vernatube, Centek couplings offer the best in heat resistance and strength. Precise outer dimensions and smooth inner surface assure easy connections with minimal flow restriction.

#### Fittings Family

### MATERIALS AND CONSTRUCTION

|                     |                                                    |
|---------------------|----------------------------------------------------|
| Process             | Filament Winding CNC, Resin Transfer Molding       |
| Resin               | Class 1 Fire Retardant Epoxy Vinyl Ester Thermoset |
| Glass               | Corrosion-Resistant E Glass                        |
| Glass / Resin Ratio | 60%                                                |

### ATTRIBUTES

|                       |                                                                               |
|-----------------------|-------------------------------------------------------------------------------|
| A1 - OD (IN / MM)     | 2.50 / 64                                                                     |
| A2 - OD (IN / MM)     | 4.00 / 102                                                                    |
| C - Lengthj (IN / MM) | 9.00 / 229                                                                    |
| Color                 | Standard Unpainted, Black, White; Gel-Coat; Yacht Quality, Yacht Quality Plus |
| Approvals             | Lloyd's Register Type Approval                                                |
| Flame Retardancy      | UL94V-0                                                                       |
